

Improving Quality VMMC

Project IQ Webinar Series

A Healthy Obsession with Safety: Improving Programs through Management and Reporting of Adverse Events

Agenda

1. Introduction to Project IQ Carlos Toledo, CDC
2. Adverse event cluster in a resettlement area in Zimbabwe Amy Herman-Roloff, CDC
3. Bleeding disorder in South Africa Tigistu Adamu, Jhpiego
4. PEPFAR Notifiable Adverse Events & Second Edition Adverse Event Action Guide Renee Ridzon, OGAC

Project IQ

- Project IQ: “Technical Assistance to Provide High-Quality VMMC Services to Programs Supported by PEPFAR”
- Centrally-funded CDC mechanism which field offices can also put COP funds into for country-specific specific quality activities
- Project period: April 1, 2015 – March 31, 2020

Project IQ: Goal & Objectives

- Provide comprehensive global TA to support safe, high quality VMMC programs:
 - Integrate standards and indicators within national systems
 - Standardize quality approaches
 - Improve timeliness, accessibility, actionability, and quality of VMMC data
 - Build local capacity to implement QA and CQI
 - Evaluate effectiveness of QA/CQI in improving quality of VMMC services

Project IQ: Activities

Tool digitization

CQI design and implementation

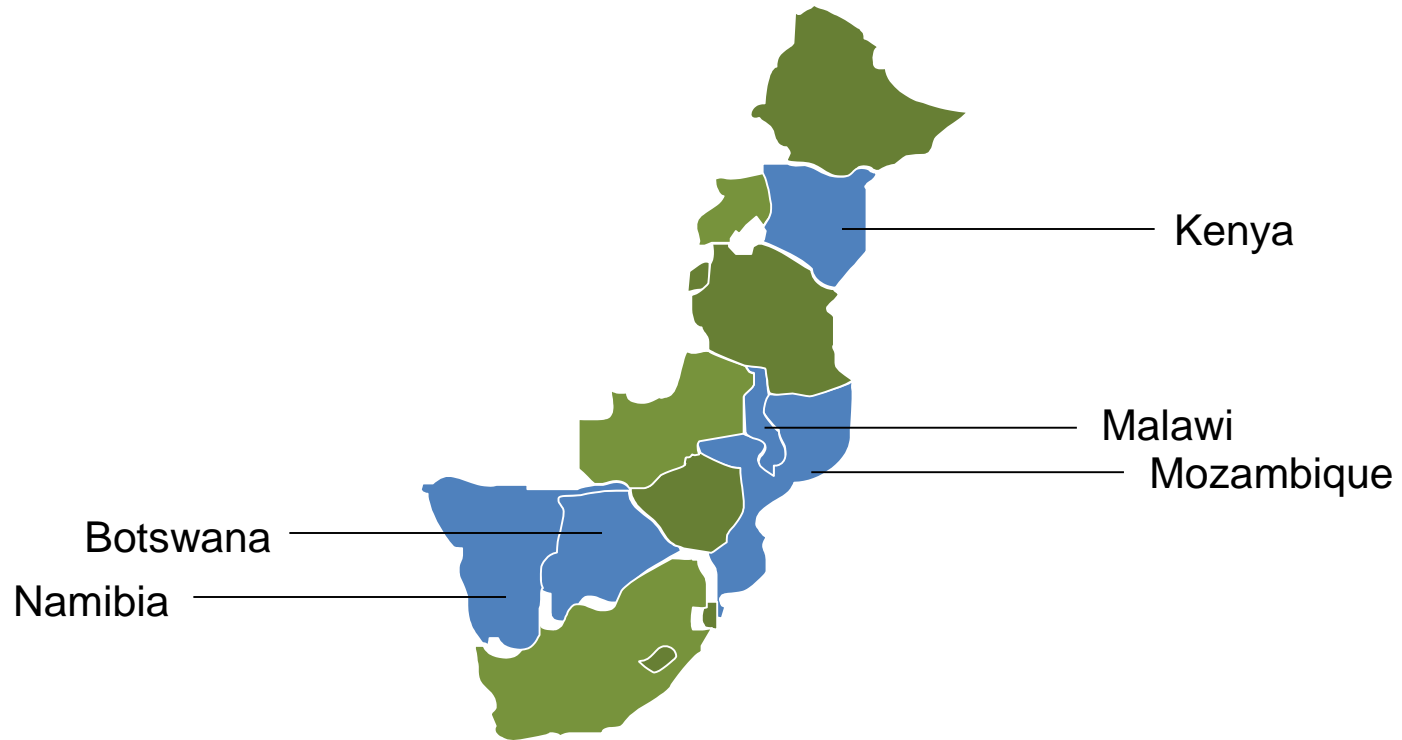

Technical assistance

Service delivery support

Project IQ: Past & Current Countries

Quarterly Webinars

- Purpose: Convene USG VMMC field staff and implementing partners, and other key stakeholders including Ministries of Health to discuss essential topics for maintaining and improving the quality of VMMC services.
- Next webinar: August 2016
- Join Project IQ mailing list:
